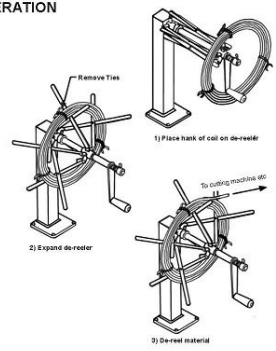
# Collapsible Reelers and Dereelers

## OPERATION



A range of collapsible reelers for producing neat coils of material or may also be used for de-reeling materials supplied in hanks or coils. All units are easy to use and incorporate devices to attach material to reel frame when starting a coil. The Model CW10 and CW20 have an adjustable clutch arrangement to prevent overruns in de-reeling applications. Ideal for production kitting, jobbers, electrical contractors and all users of long lengths of wire and cables.

The ideal units to use in de-reeling, measuring, cutting and reeling operations.

The CW10 and CW20 are supplied as standard with bench stands and the CW30 is supplied as standard with a floor stand. An optional adjustable floor stand is available for the CW10 and CW20.

CW10 - Small Reeler for Wires

CW20 - Medium Heavy-Duty Winder for Wires and Small Cables

CW30 - Large Heavy-Duty Winder for Large Cables
