

Crimp Tools for Medical and Electronics Applications

Micro Thread Crimp Tool 615466, 615466-1, 615466-8

- 4 or 8 indent crimp
- Micro thread adjustable
- Cycle controlled ratchet

The Astro micro-thread adjustable hand crimping tools are equipped with an adjustable limit screw which controls the proper crimping depth for contact size and wire range. These tools are designed to crimp contact sizes 12 through 20 AWG. Crimp depth is determined by loosening the lock nut and adjusting the limit screw. A gage is used to check for the desired indenter opening. The lock nut is then tightened, locking in the desired depth.

These tools use the same locators as Astro's standard size microcrimp adjustable tool (**612548**).

The **615466** tool is 9 inches long and weighs approximately 19 ounces.

Astro will design the micro-thread adjustable tool with a variety of locators or indenter types to fit your specific needs. Please consult the factory for further information.
