

Forming Machine Type A 075 Ri

for ICs in TO Case

Component forms

Specification

- dimension 360 x 430 x 400 mm
- weight approx. 20 kg
- electrical 230V / 50 Hz / 60 W
- compressed air min. 6 bar, max 8 bar
- pitch min. 7,62 mm, max. 19,9 mm
- components in tubes
- production rate 10.000 components/h (continuously variable)

Description:

The forming machine type A 075 Ri is designed to form the leads of dual in-line package components utilizing a tube-to-tube feeding configuration. The machine is able to process DIP's in a wide range of component sizes (from 7,62 mm up to 19,9 mm). The adjustment of lead span can be preset and is displayed on a digital panel.

The supply of components can only be done by the use of component tubes. The processing speed is continuously variable. Up to 5.000 components can be processed within an hour.
