

Solder Dispenser + optional devices

DS-2500

Keeps the working area tidy and reduces solder waste through a guiding tube. In the back of the dispenser it is possible to insert different hand tools to be used by the operator while soldering (such as soldering pump, tweezers, pliers or screwdrivers). It can be positioned in such a way that the hands of the operator are free to use soldering iron and components.

Suitable for all gauges up to 2500 g.

Length 100mm, hole $\varnothing > 15\text{mm}$

Dimensions : 190 x 150 x 150 h mm

Weight : 1.4 kg .
